

PQSA TRAINING ROOM GETS A BOSCH AND EPSON SOLUTION

Integrated Audio Solutions competed audio and video installation for the Paraplegic and Quadriplegic Association of SA training room.

A simple vision solution was implemented, incorporating Epson projection and Westinghouse pull down screen. The Epson projector was chosen for its excellent light output for the light requirements of the room and long term cost-effective lamp replacement.

The speakers chosen to compliment the projection where a pair of Bosch LB2 premium cabinet speakers, with the ability of clear High-Fidelity music and speech reproduction. The Bosch LB2 speakers are performance matched to the to the Bosch Plena PLE-1MA030 mixer amplifier, easy-to-use, four (4) microphone inputs and three (3) music source inputs The Bosch mixer amplifier was an ideal cost effective solution allowing for the training rooms future expansion requirements.
